

Royce

Land Surveying, P.C.

October 11, 2007

To Whom It May Concern,

Jake Carey has done an excellent job of supporting the startup phase of my land surveying company. From the testing of the equipment, through purchasing, delivery, and to the present, Jake has been available for any question or issue I've had at any time. Moreover, the Topcon equipment is excellent. The performance of the GR-3 GPS and 9003 Robotic Total Station have exceeded my expectations and have outperformed any survey equipment I have used.

I highly recommend Jake Carey, Geoshack, and Topcon as the best combined source to meet any survey equipment needs. Jake's assistance has been critical in the getting my surveying business off the ground.

Sincerely,

Michael Royce
President
