GeoShack and Topcon Selected to Provide GPS Machine Control for Texas Toll 130 Highway Project

DALLAS, TX – August 14, 2009 - GeoShack (Dallas, TX) and Topcon Positioning Systems (Livermore, CA) have been selected as the GPS Machine Control and GPS Survey provider for T. J. Lambrecht Construction (Euleless, TX) for the extension of the Texas Toll 130 Highway project extending from Austin, TX to Seguin, TX.

The Texas Toll 130 project will extend over 40 miles and will require over 13 million yards of material to be excavated. It is estimated that the T. J. Lambrecht portion of the job will take about 24 months and will complete the 130 Toll Road that was started in 2003 by Lone Star Infrastructure. Lambrecht was a joint venture partner in Lone Star Infrastructure and was responsible for the heavy earthworks on the initial phases for Toll 130. Lambrecht will be utilizing unique Topcon technologies such as mmGPS and 3DMC² on this project. This technology will provide guidance and automation for Caterpillar equipment such as Cat14M Motor graders and Cat D8T Dozers.

Ron Julian, Equipment Manager for T.J. Lambrecht, was quoted as saying that "Topcon GPS based grade control systems from GeoShack, the largest Topcon Machine Control dealer in the US, were chosen because of the unique mmGPS technology from Topcon that yields the tightest vertical accuracy on the market today and the quality service and support offered by GeoShack".

T. J. Lambrecht Construction is one of the largest heavy, civil, earthmoving contractors in the country, with one of the largest and most current fleets of Caterpillar equipment. Visit www.tjlambrecht.com for additional information.

Topcon Positioning Systems is the worldwide leading developer and manufacturer of precision positioning equipment and offers the widest selection of innovative precision GPS systems, laser, optical surveying, and machine control products. Visit www.topconpositioning.com for more information.

GeoShack North America, Inc. is a leading distributor of leveling, alignment, measurement, guidance and grade control solutions to the Construction, Survey, Agricultural, Landfill, Mining and Industrial markets in North America by providing our customers with a “total solution” of quality products and services to meet their needs. GeoShack has been awarded Topcon’s “Dealer of the Year” for both 2007 and 2008. For more information about GeoShack please visit www.geoshack.com.
